Dialysis Copilot · Kulya · Sulaimani

Dialysis Is More Than a Session

● Dialysis unit · ○ Life at home

Patients Families Care Teams

1 · PROBLEM — SULAIMANI

Disconnected Dialysis Care

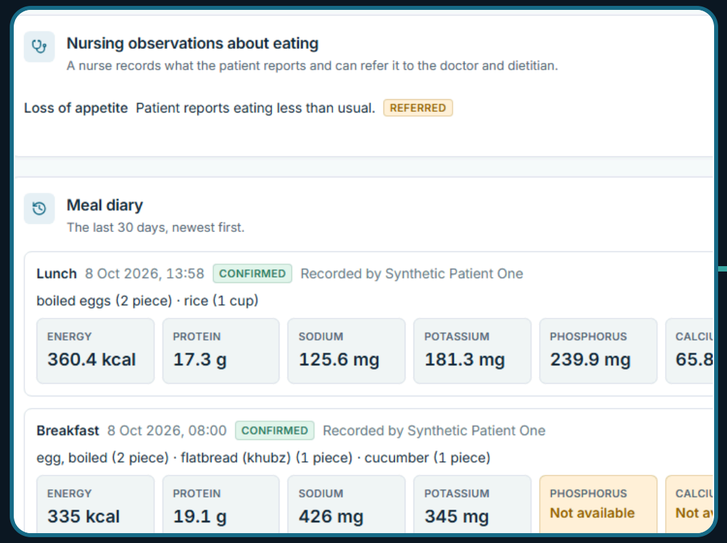

- Manual Records
- Delayed Follow-up
- Complex Information

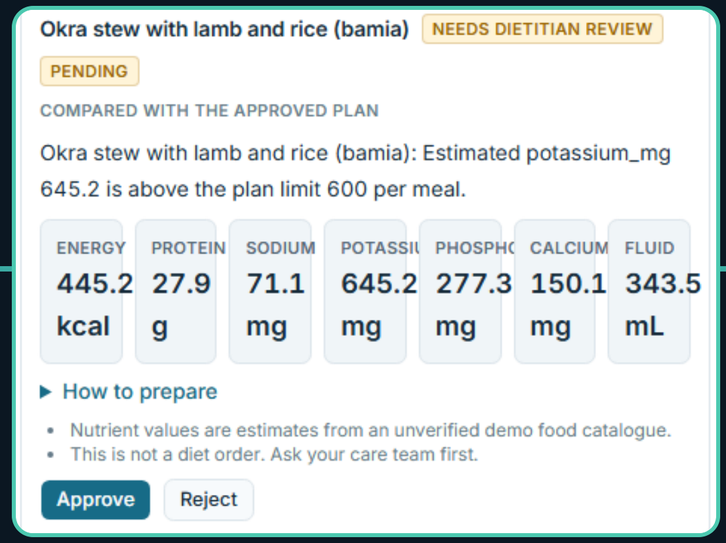

Workflow gap: our hypothesis, to validate with Sulaimani centers · local studies cited in notes

2 · SOLUTION

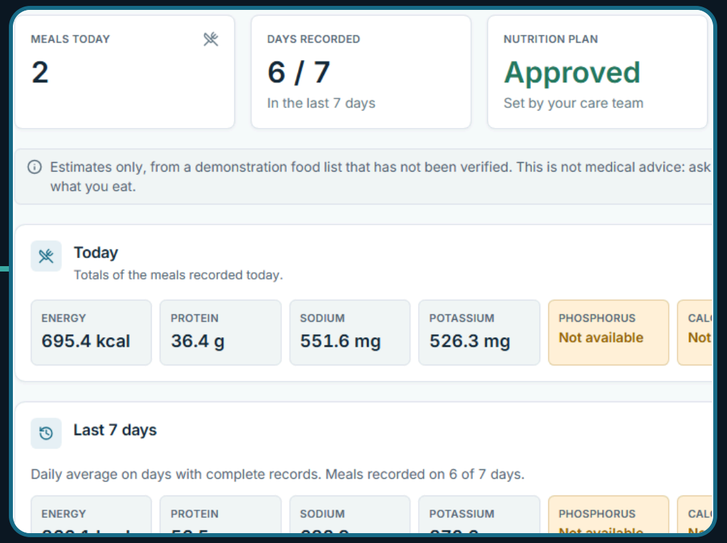

One Connected Care Platform

Nurse · refers

Clinician · reviews

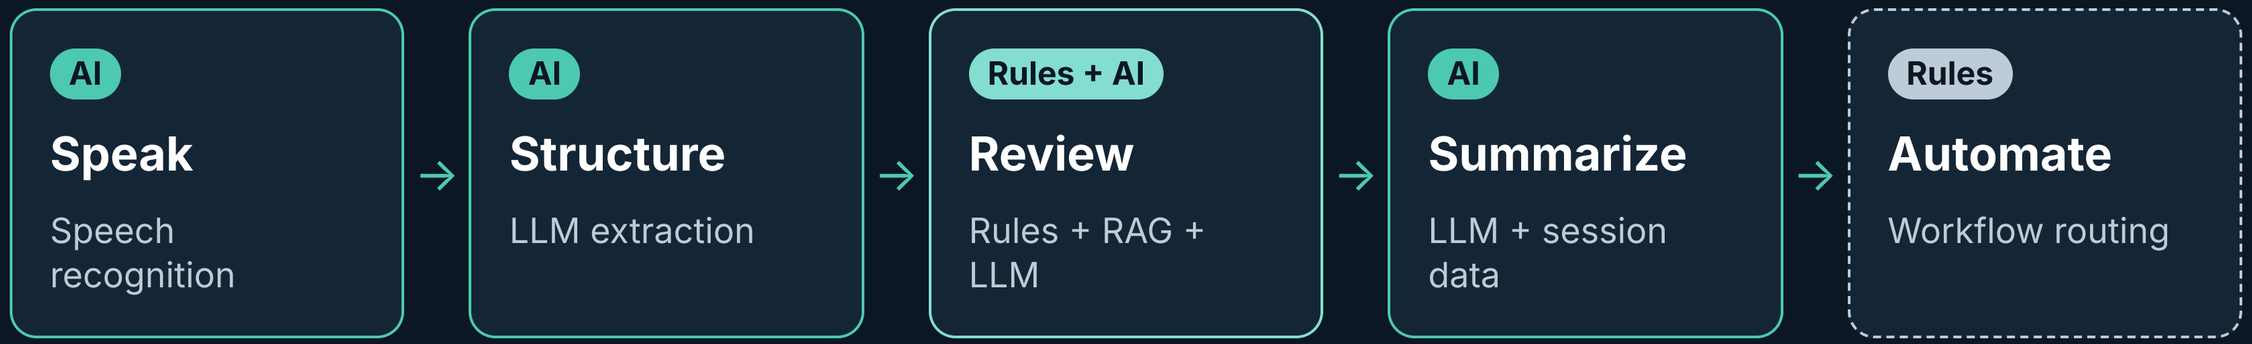

Patient · understands

Entered once → seen by everyone who needs it

Real Kulya screens · synthetic demo data · role-based access

3 · USE OF AI

AI Turns Information Into Action

Nutrition Copilot

Meal text → foods → nutrient estimates

Humans decide

Nurse confirms · Doctor reviews · No prescribing · No device control

LIVE DEMO · 45 SECONDS

From Voice to Doctor Review

Real Workflow

Working Prototype

Synthetic patient · any recording is labelled "Recorded demo"

4 · TWO-DAY FEASIBILITY

A Focused Two-Day MVP

Day 1

Core dashboards

Session documentation

Patient records

Role permissions

→

Day 2

AI documentation review

Session summaries

Doctor follow-up

End-to-end tests

→

Working Demo

Synthetic data · resettable

Next.js | Django REST | PostgreSQL | Pretrained LLM API | Rule-based workflow

Future: device integration · real data · Kurdish UI · clinical use needs separate validation

Making Dialysis Care Simpler

INTENDED OUTCOMES

- **Less Paperwork**
- **Clearer Follow-up**
- **Accessible Care**

Seeking clinical partners in Sulaimani for a supervised pilot.

Baraa Abdulrahman · [email]
